

20% Rebate on Weatherization - up to \$750

Weatherization can make your home more energy efficient year round. With some simple, easily installed measures, your heating and cooling systems will be more effective. You'll reduce energy consumption and save money. Plus you'll be doing your part to help the environment.

Optimize your home's efficiency and help cut energy bills with weatherization. When you install any or all of the following qualifying measures, you'll receive a 20% incentive, up to \$750 per residential heating account.

Attic Insulation • Attic stairs insulator • Wall insulation • Basement or crawl space insulation • Rim joist insulation • Heating system duct/pipe insulation • Attic ventilation* • Ductwork leakage testing and sealing • Infrared inspection • Air infiltration testing and sealing

Sealing and insulating is a cost effective way to improve efficiency and comfort in your home. Weatherizing is easy. Select a pre-approved contractor to insulate and air seal and you can receive a rebate for 20% of the cost up to \$750. The contractor will even complete and submit the incentive form. Do-it-yourself installations do not qualify.

Call 1-800-292-2032 or email ngridinfo@efi.org for a list of qualifying contractors.

*Done in conjunction with attic insulation only.

Have You Analyzed Your Home Energy Use?

A home energy assessment is the first step in making your home more efficient. An assessment will check your home energy use and provide recommended measures you can make to improve efficiency and save money. National Grid offers two assessments.

- **Try our Online Energy Analyzer** for a quick and easy way to evaluate your energy use and receive customized tips. Visit www.thinksmarthinkgreen.com
- **Our FREE In Home Energy Assessment** is the next step to receive recommendations for improving efficiency based on a thorough evaluation of your home. Request an in home audit on this application or call 800-860-0815 today.
